

PM Regulation 2017 vs 2024 comparison

PM Regulation 2017 (Excel)

1. $RW = (1000 \times P) / (T \times L)$

P: Points collected at event (taken over as is)

T: Participants (divided by number of fleet)

L: Number of races (without discard)

2. Add best $(L1 \times RW1 + L2 \times RW2 \dots) / TL$ - sum weighted by L*

until reaching 60% of races

Potentially only 1 event counts/all events count

Last event may count partially

**Note: weighing by L eliminates L!*

PM Regulation 2024 (Manage2Sail)

1. $RW = P \times L$

P: Points corresponding to Ranking at the event

1st: T points, 2nd T-1 points, etc.

(M2S Point System : High Point)

T: Participants (division by fleet not necessary)

L: Number of races (without discard) = Points factor

2. Add best $RW1 + RW2 \dots$ - simple sum

until reaching about 60% of events:

1 event discarded after 3 events, 2 after 5
